'**Equations of motion Wikipedia**

June 23rd, 2018 - In mathematical physics equations of motion are equations that describe the behavior of a physical

system in terms of its motion as a function of time More specifically the equations of motion describe the behaviour of a

physical system as a set of mathematical functions in terms of dynamic variables normally spatial coordinates and

time "**Skoltech Course Catalog**

June 21st, 2018 - All Master and Ph D students within the Energy Program are encouraged to attend the Energy Colloquium during the entire period of their studies'
